Defibrillator Overview

The Physio-Control LIFEPAK 9 defibrillator/monitor was designed to meet the needs of clinical, biomedical engineering, and purchasing professionals throughout the country. This unit's simple 1-2-3 operation and user-friendly display, plus its compact, portable, space saving design, revolutionized in-hospital defibrillation.

Innovative features include high and low energy select displays, annotating recorder that prints out time, date, leads, and gain, and CODE SAUMMARY critical event record, which recaps critical events from the moment of "power on". This unit also features a Defibrillation Adapter used with auxiliary paddles for "hands-free" defibrillation. An optional Shock Advisory Adapter converts the LIFEPAK 9 defibrillator/monitor into an automatic external defibrillator for hospital codes.

Designed for ease of maintenance with on screen diagnostics for simple test and calibration, this unit includes an integral chassis which allows 3600 service-ability.
